

# Metropolis Series

**C&A Furniture is proud to introduce a brand new series which combines typical veneer materials, aluminum laminate accents, and Formica Veneer.**

**Formica Veneer wood surfacing is real wood laminated to a phenolic core which provides the practicality of a high pressure laminate with the warmth of natural wood grains. However, because it is made from engineered veneer, it provides more consistent pattern than conventional wood veneers.**

**This contemporary series is non handed and fully modular. It includes recessed symmetrical return/credenza with plenty of storage, aluminum accents and a power grommet. Mobile pedestal provides additional mobile storage.**

**Variety of configurations and veneer/stain combinations are available as with any other series by C&A Furniture.**

**\$3,500 NET for entire U group**

**\*price includes freight**
